Navigation bar

Have a floating navigation bar - like lumi's - with the CTA: 'Join our discord community for early access!' and then have a countdown timer like Lumi but have it to end on the 25th September 'Launching in...!'

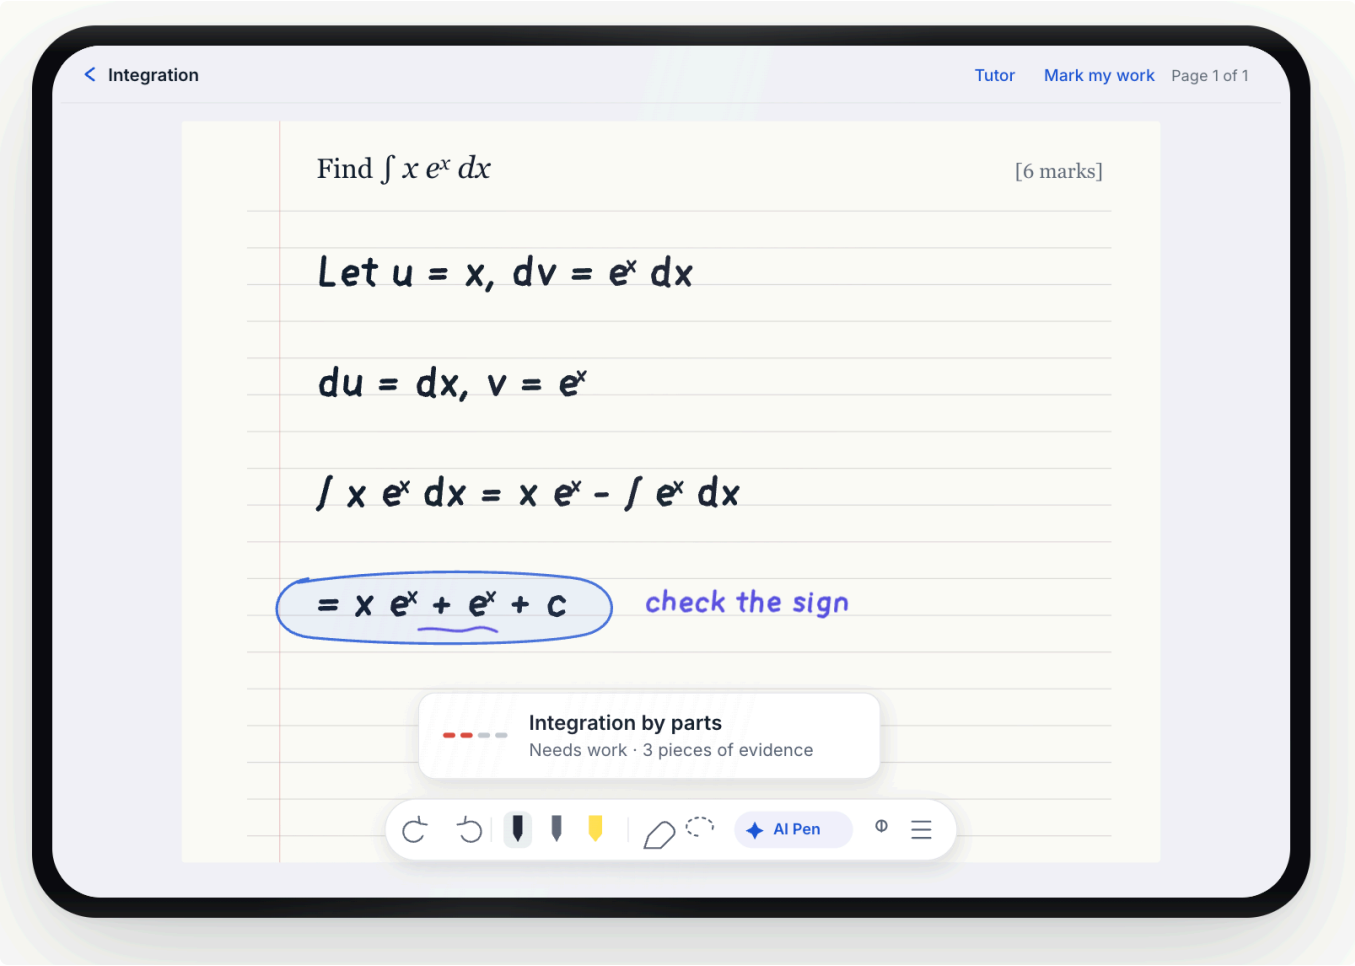

Discord link: https://discord.gg/mPhTczwfpk

Hero section

"MeSsY hANDwrItiNg?"

OPTION 1: "Plumi reads your handwritten working, marks every step and teaches directly on the page."

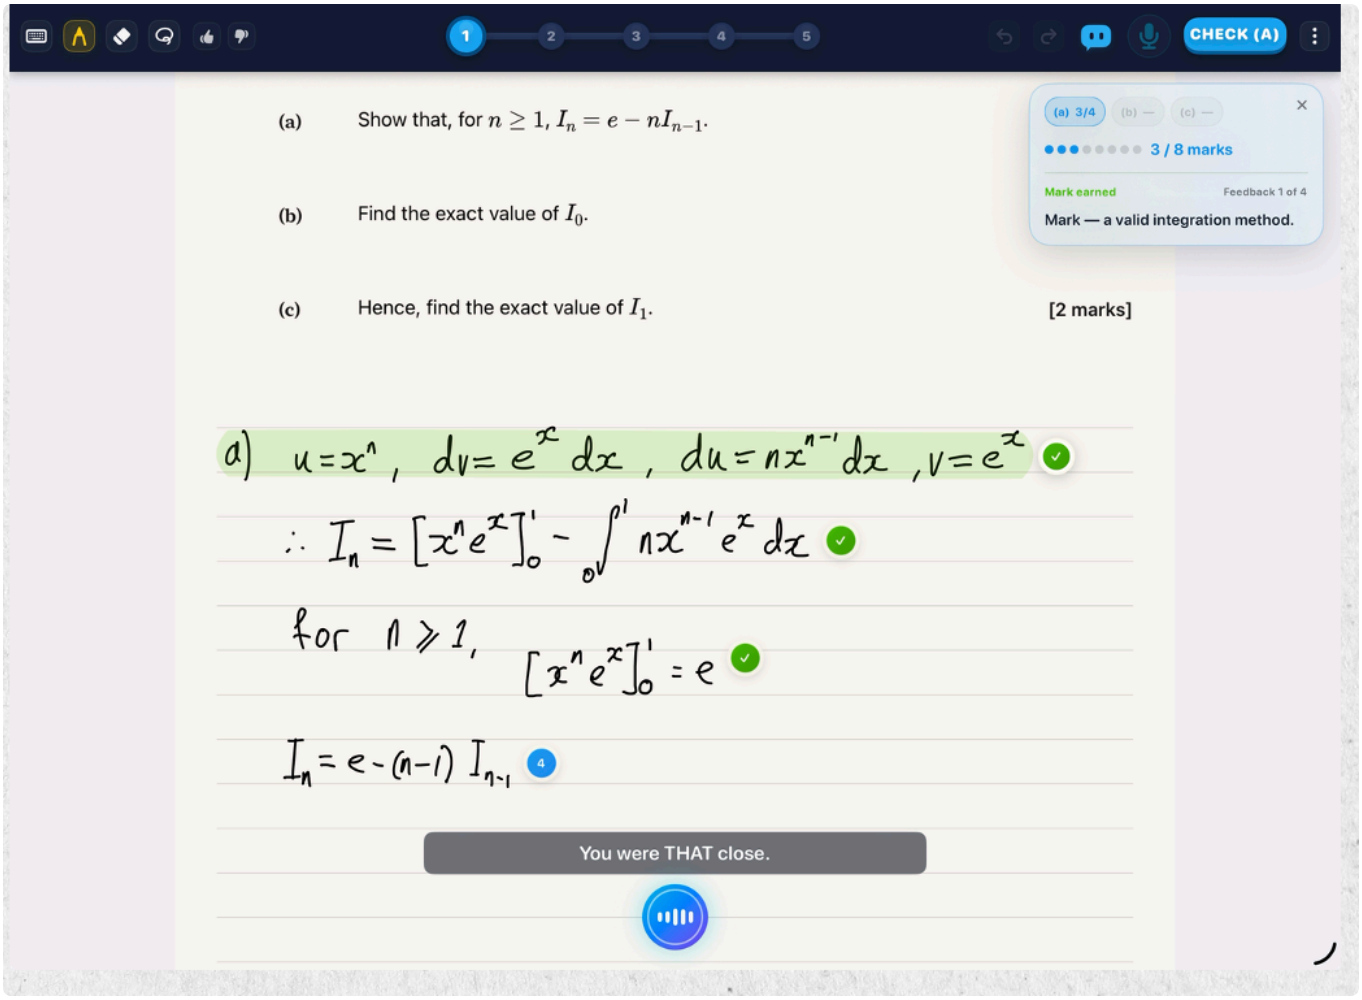

OPTION 2: "*Plumi* reads it anyway,------> (sloping line) marks it ✅ (Plumi tick)... and **remembers** it

Integrate it with your own handwriting (make an error on purpose like in the image).

Show a fast timelapse (like you've already done) but show the AI Plumi Pen highlighting and marking the work.

For example:

But show a fast timelapse of doing the working out followed by the pen bouncing around and marking the work. (NEW FEATURE: Plumi should also green/yellow/red highlight your work - better than underlining/circling)

Unique Value Proposition

Show the following features (have it as an animation for each one):

Caption:
Study GCSE and A Level (whatever subjects we offer right now)
then in a smaller font reference the exam boards we support

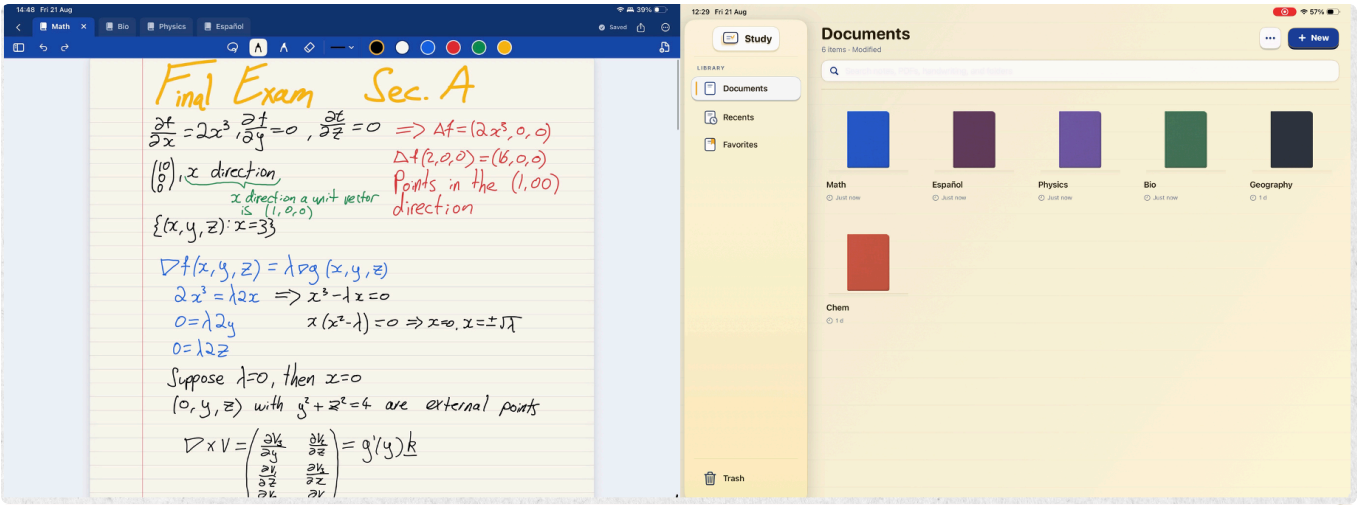

Caption:
We also have free notes, stop paying for Notability!

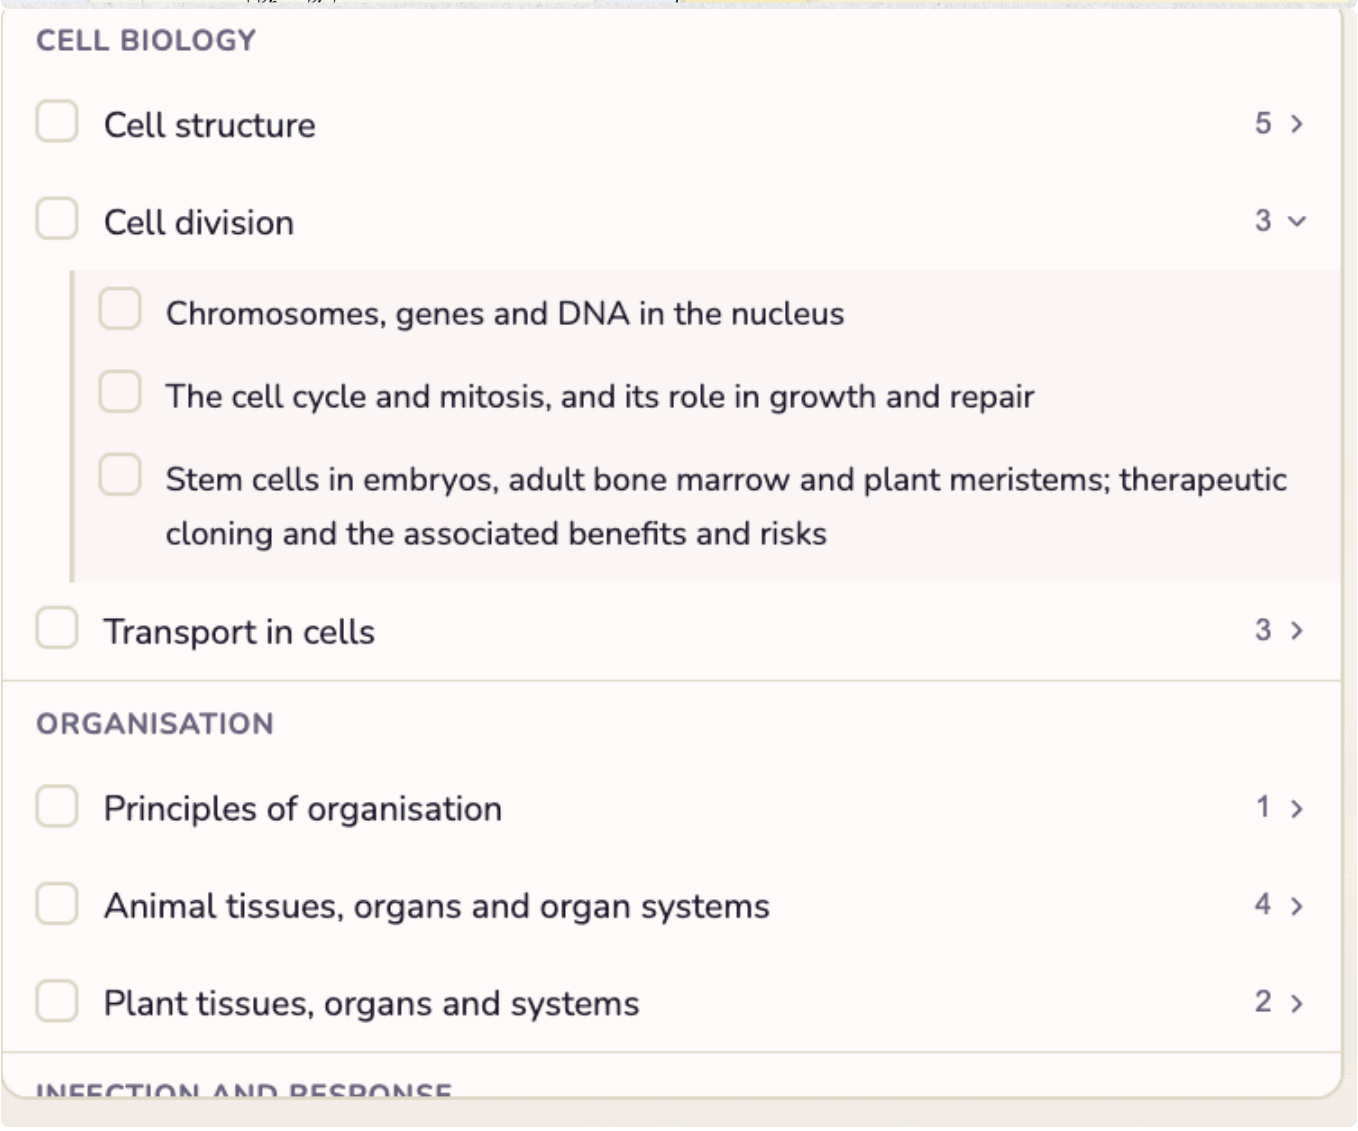

Caption:
Create custom study sessions by topic

Add an animation for exam mode
Caption:

Time for exam mode? Click or upload any past paper and enter exam mode, all your apps become blocked and the timer starts ticking

Caption:
Study with friends - create a shared workspace and work together, who knows your Plumis could become pen buddies!

Humour

"And *yes*, you can even tease Plumi"
(Show Plumi being swung around the page)

CTA

Join our discord community for early access!

(remove waitlist high friction for user, when a user onboards in our discord we can prompt for their email anyway)
